

A low-angle, upward-looking photograph of several modern skyscrapers. The sun is positioned at the top center, creating a bright sunburst effect that illuminates the glass facades of the buildings. The sky is a clear, deep blue.

Infobelt Essentials for SAP

Infobelt is Certified for SAP S/4HANA Archiving

Infobelt Essentials for SAP has received certification for integration with SAP S/4HANA 2023! This certification, confirmed by SAP SE, validates our product's technical compliance with SAP's rigorous standards.

SAP[®] Certified

Infobelt Essentials for SAP has been engineered for effectively archiving structured or un-structured content from SAP (and non-SAP) systems to serve customers with variety of data management needs.

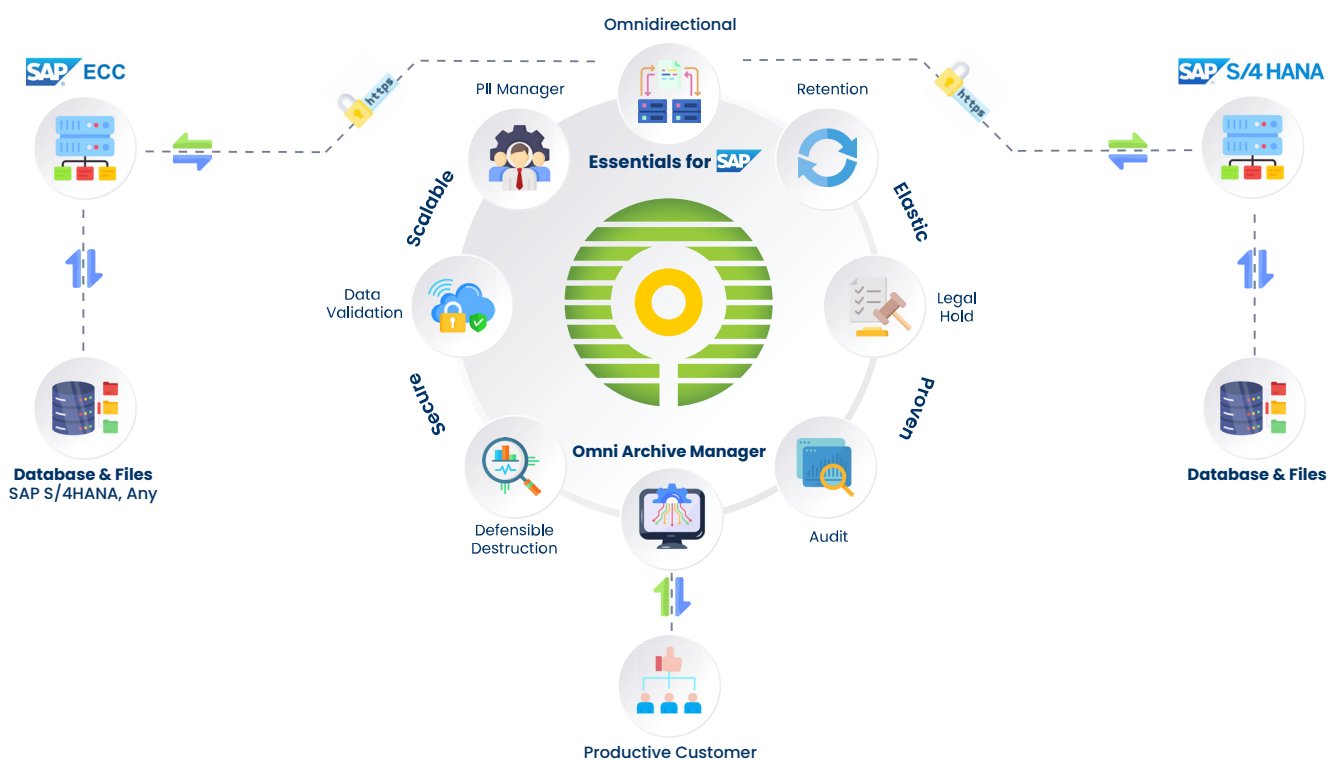

Benefits to SAP Customers

- » Implementation: Choose from On-premises, on Cloud, and Hybrid models
- » Integration: Pre-built connectors for SAP & Non-SAP systems
- » Data Management: Manage structured & unstructured data in one place
- » Regulatory Compliance: Automate data governance with built-in eDiscovery
- » Data Security: Protect sensitive information with immutable storage.

Unified Data Archiving and Regulatory Retention

Archive structured and un-structured content from SAP and other instances to ease cloud migrations, improve system performance and reduce costs. Implement Information Lifecycle and ensure regulatory/corporate compliance. Avail AI enabled data access tools for natural language queries and semantic search.

Advantages of Infobelt SAP Data Archiving

- » Connect to multiple SAP instances
- » Cross-platform data archiving
- » Retention management & legal holds
- » Robust auditing readiness
- » SAP records management compliance
- » Optimal performance & scalability
